Definice Cloudu

Gartner defines cloud computing as *"a style of computing in which scalable and elastic IT-related capabilities are provided 'as a service' to external customers using Internet technologies."*

5 Attributes That Support Outcomes

1

Service-Based

Figure 1. Definition of Cloud Computing

are abstracted from provider concerns through service interfaces.

2

Scalable and Elastic

Services scale on demand to add or remove resources as needed.

3

Shared

Services share a pool of resources to build economies of scale.

4

Metered by Use

Services are tracked with usage metrics to enable multiple payment models.

5

Internet Technologies

Services are delivered through use of Internet identifiers, formats and protocols.
